1. What is a Templated Item?

A templated item is a standard item for which the Supplier has attached a form for the Buyer to complete in order to customise the item and/or to collect additional information. The concept is the same as a partial item. Customisation does not change the pricing of the item.

2. Steps to create and publish a Templated Item

- a. Product Manager: Content Loader - Upload Template Data via csv (Separate guide)
Editing and uploading the item attribute options provided by the Supplier for the Buyer to choose from. For example, these could be “red”, “blue”, “white” (for t-shirt colours) or free text box (for the Buyer to
- b. Product Manager: Item Templates – Create Template in Directory (Separate guide)
Create the form to attach to the item
- c. Product Manager: Edit Item – Attach Template, Manage Template Data (Separate guide)
Attaching the form and editing options for the Buyer in the UI (compared to via the csv upload)
- d. Publish to Marketplace
