1. Attaching a Form to a Standard Item

After you have created a form in the Directory, this can be attached to the item by going to the Item Directory and select as appropriate. In Edit Item, you access the Template Directory by clicking on the below.

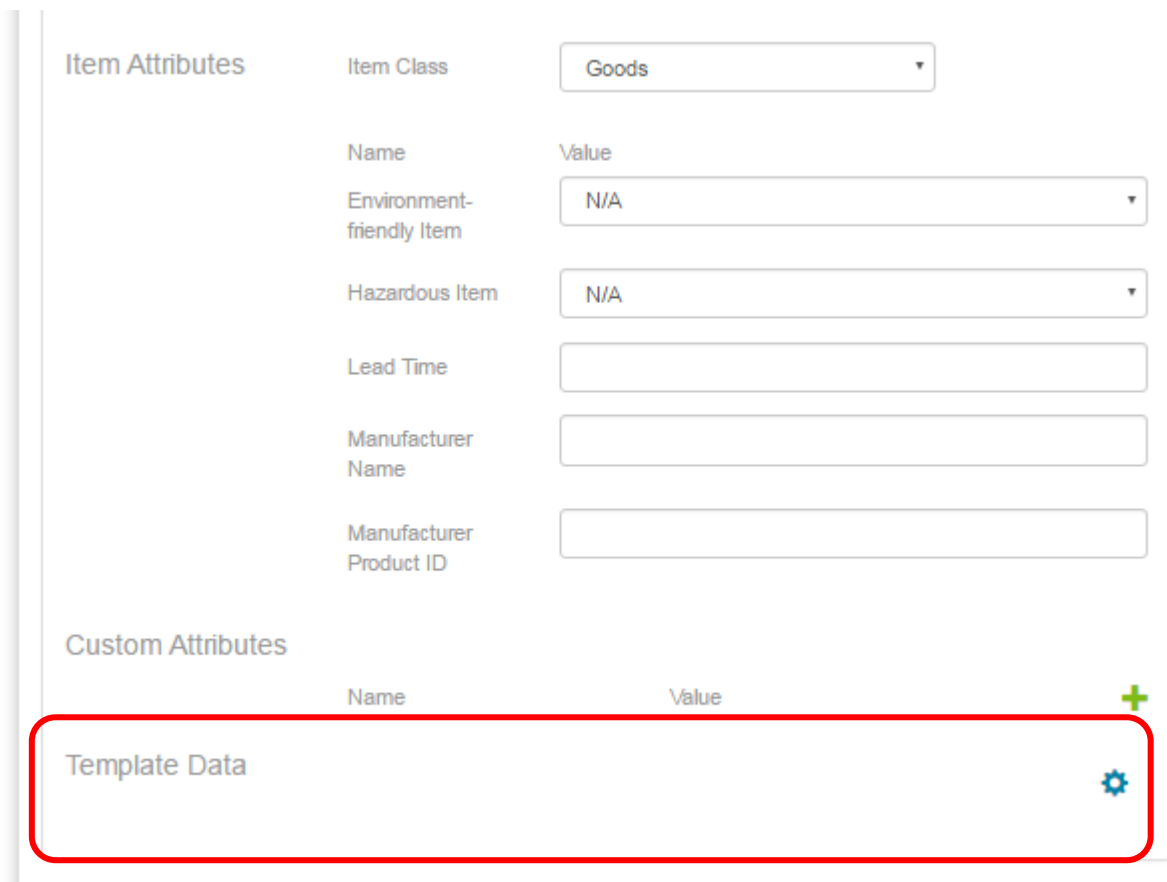

Select and attach the template by clicking the below and then “Done”. This will take you back to the Edit Item Page.

2. Managing the Templated Item Data in the UI

Besides managing and editing Templated Item Data via a CSV file on the Content Upload Page, you can also do so via the UI.

Once you finished editing, click Save.

Manage Template Data
